

## ECOM - Add Related Products

This guide will walk you through how to use the ecom admin tool to add related products to product code pages.

1. Log into iNextAdmin & Open a Product Code Page
2. Assign a Related Product
  - i. Click on the Related Products tab
  - ii. Click on the Not Assigned Radial
  - iii. Search by Product Code Title or Product Code Number
  - iv. Once you've found the asset to assign, click Assign

The screenshot shows the 'Product Code Detail' page for '209FFL - Dielectric Unions Lead-Free (FIP x FIP)'. The 'Related Products' tab is selected. A search bar contains '209FXL'. Below the search bar, there are radio buttons for 'Not Assigned' (selected) and 'Assigned'. A table lists related products with columns for Product Code, Title, and Commerce Category Path. The 'Action' column contains an 'Assign' button. A blue box highlights the 'Assign' button, and a blue box highlights the 'Not Assigned' radio button. A blue box highlights the search input, and a blue box highlights the 'Related Products' tab.

3. Update Relationship Type
  - i. Click on the Assigned Radial
  - ii. Click the Dropdown and Select Relationship Type
  - iii. Click Save, Click Publish

The screenshot shows the 'Product Code Detail' page for '209FFL - Dielectric Unions Lead-Free (FIP x FIP)'. The 'Related Products' tab is selected. A search bar contains '209FXL'. Below the search bar, there are radio buttons for 'Not Assigned' and 'Assigned' (selected). A table lists related products with columns for Product Code, Title, and Commerce Category Path. The 'Action' column contains an 'Unassign' button. A blue box highlights the 'Assigned' radio button, and a blue box highlights the 'Relationship Type' dropdown menu. A blue box highlights the 'Save' button, and a blue box highlights the 'Publish' button.

## Relationship Types

**One Way** – a product code assigned as a one-way relationship will show as a related product at the bottom of the product code page it has been assigned to. Multiple related products can show on a single product code page, if assigned.

**Two Way** – a product code assigned as a two-way relationship will show as a related product at the bottom of the product code page it has been assigned to AND the product code it has been assigned to will show as a related product at the bottom of the product page that was assigned. Both product code pages must be published for the products to show on both pages. It's probably best to run a full site publish after making lots of changes.
