Setup the Windows short cut below so Chrome does not display the print dialog window when you press the Print Agreement button from within integraRental agreement screen. This allows for faster printing of agreements during a customer check out workflow.

1. Right click on your computer desktop and choose new and shortcut (if running windows 11 you may have to click more options before you get to new)

2. For the Location type in "C:\Program Files\Google\Chrome\Application\chrome.exe" --kiosk-printing "https://yourcompany-rental.integrasoft.net" (the portion in red

would be your url)

3. Click NEXT and for the name I would suggest IntegraRental and then click Finish

4. You will now have a new desktop icon that you will use to launch IntegraRental from that will allow you to quickly print agreements without the print prompt popping up.
