Active Authentication Provider

☐ Entra Single Sign On
☐ Legacy Password and Require MultiFactor Authentication
☒ Legacy Password

Entra Connection Information

Tenant ID :

Client ID :

Client Secret :

Steps to enable Single Sign On (SSO)

1. Enter and save Entra ID credentials
2. Assign Entra IDs to system users (SSO) user Configuration)
3. Set Entra ID as the active authentication provider.

SSO System Security Configuration

Certificate Of Insurance in eRental – Online renters can now upload a copy of their certificate of insurance (COI) during the eRental checkout process. COI information submitted is included in the Submitted eRequest for review. Customers with an eRental login are now able to login to their eRental website and update or upload a new COI in the My Account Portal.

When your customer uploads or replaces a COI within My Account, you will receive an email with the user-entered details (Insurance Coverage Limit / Expiration Date) as well as an attached image of the COI document. There is no approval process so you will need to review the notification email and update the customer record accordingly if you find any issues with the submitted COI. If interested in utilizing this feature, contact your integraSoft support rep to have this app setting turned on.

2026 COI - Big Dog Construction.pdf

Accepted formats: PDF, JPG, JPEG, PNG, GIF

COI Limit *

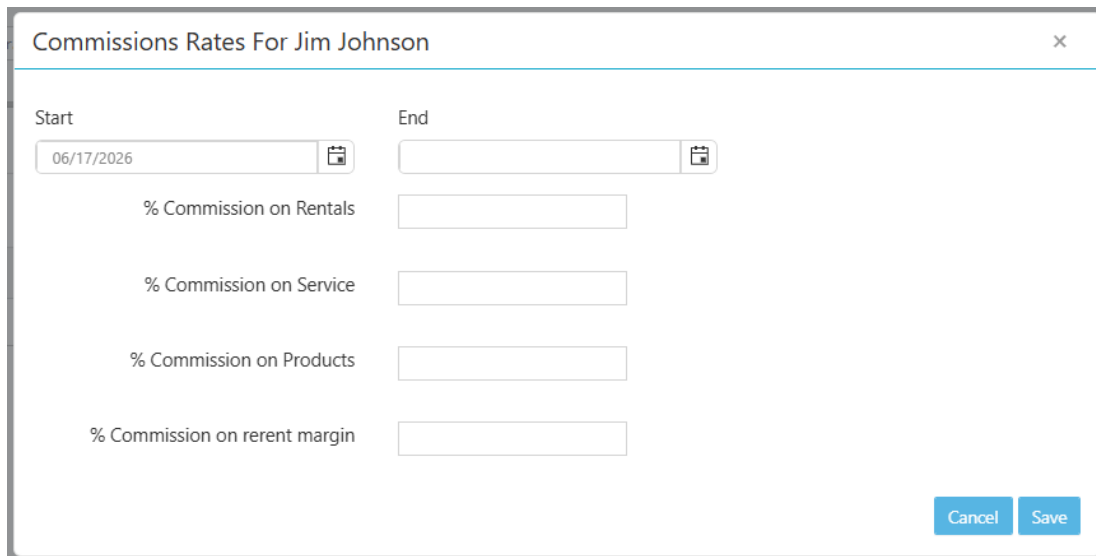

2,000,000

COI Expiration Date *

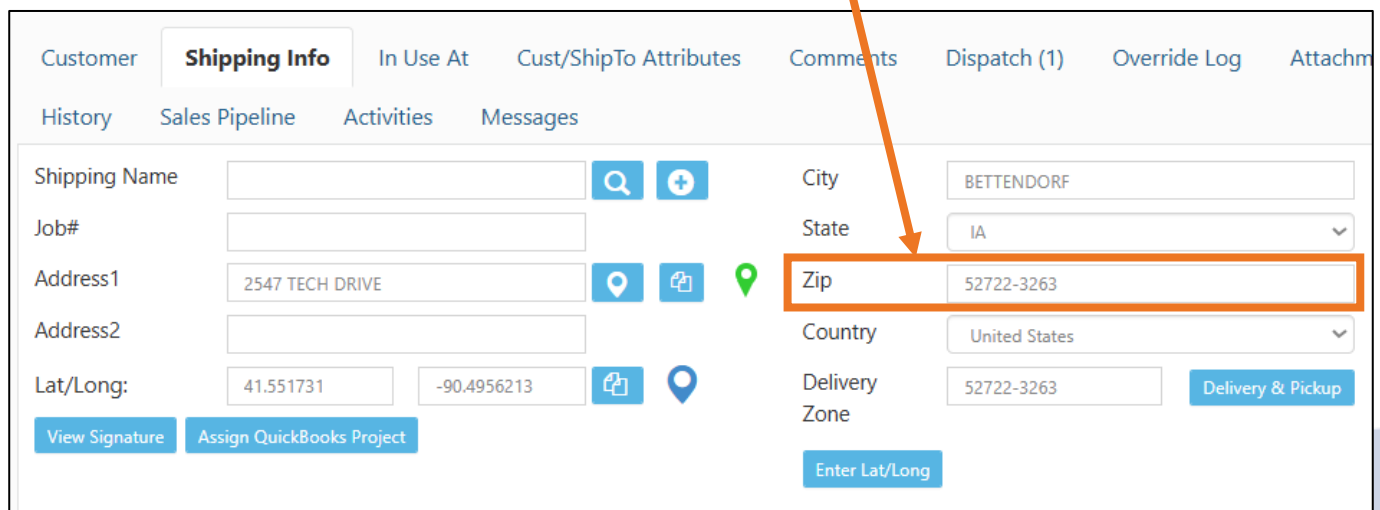

12/31/2026

☐ Continue without uploading a COI

ReRental Commission Tracking – To improve sales rep commission tracking, we have diversified the sales rep setup options to include ReRental-specific income. Ownership and management users now have more flexible sales rep setup criteria and convenient access to ReRental vs owned rental asset commissions.

Zip Code + 4 Enhancement – To better align ourselves with QuickBooks regarding their management of billing and shipping addresses, integraRental has been updated to support the zip code + 4 address format. The software will now allow for both manual entry of the additional four digits as well as automatically applying them when using the address validation function. The expanded zip code format will also appear on printed documents.

Fields Added to Rental Asset Master Import – Additional fields have been added to the function found under the Import/Export tab of the main menu labeled Import Rental Asset Master. These additional fields include new and old data points which were previously omitted from the field mapping options, giving users the ability to import more complete asset master data.

integraERP-Specific Features (Requires integraERP 3.07 or higher)

Loan Amortization – Enter and track loans including amortization schedules and exportable data for high level lending management. With features including GL updating, multiple loan types, and user permissions to control access, this new module provides all the tools necessary to make asset sales convenient for your team and your customers. View the video below for more information.
